

Amvic Building System ICF Installation Training Classes

Amvic-Pacific offers a one-day intensive seminar for contractors, architects, owner-builders or homeowners interested in learning about construction using insulating concrete form (ICF) systems.

Classes provide a mixture of instructor-led class room presentations and hands-on-demonstration of the basics of construction of residential and light commercial structures using insulating concrete forms (ICF).

The AMVIC ICF block system is the primary focus of the class, nonetheless the majority of the information provided is largely applicable to all brands of ICF block construction.

The class addresses all of the requirements and practices needed to construct the ICF shell of a typical 1-3 story residence or light commercial structure. The course is targeted at professionals, however prospective homeowners with a basic understanding of construction practices and terms will be able to fully participate and benefit from the course.

The course includes:

- Features & Benefits of ICF construction: energy-efficiency, fire resistance, sound resistance, durability
- Tools required
- Footing types and preparation
- Basics of block installation and assembly
- Rebar placement & installation
- Window and door installation
- Top plate/sill & truss/rafter installation
- Bracing and pouring ICF walls
- Elevated concrete floors & roofs
- Utility installation: electrical & plumbing
- Below grade installation and waterproofing
- Multi-story applications
- Wall claddings (stucco, siding, etc.)
- Basic estimating
- Efficiency in construction
