

Project Profile

– Orchard Oaks Business Center

Project Overview

Project Name: Orchard Oaks Business Center

Project Type: Commercial Plaza

Location: Ormond Beach, FL

Size (Sq.Ft.): 14,720

Floors: 1

Amvic Installer: Titan Walls LLC

Above – Project during construction.

Above – 20ft high Amvic walls with 43 openings.

Above – Completed project with Owner, Mike Underwood.

“I was very impressed with our ability to accelerate our construction schedule using Amvic ICF in lieu of traditional masonry. The system allowed me to move tenants in ahead of schedule, reduce the loan interest period, and realize revenue sooner.”

Mike Underwood, Owner

Benefits of ICF use in the Commercial Sector

- Speed and ease of construction
- Significantly lower maintenance
- Mold and mildew resistant
- Fire resistant
- Constant temperature control
- Airtight construction

Question and Answer with the Owner

- Q** – What was the major benefit of using Amvic ICF for this location?
- A** – Amvic ICF provides the security people need in this storm prone area. I would not hesitate to camp out in this building with my family during any storm for safety.
- Q** – Why did you choose Amvic?
- A** – We needed a product that was reliable and easy to work with, both for us and the sub contractors. We evaluated a variety of products and Amvic was by far the best.
- Q** – How long was the ICF construction process?
- A** – We were finished in only 8 days!
- Q** – Any thoughts you would like to share?
- A** – Our stucco contractor, Baylor Construction had a lot of great things to say about working with Amvic ICF.
